DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/25/2007 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Response to Arguments

Claim Rejections - 35 USC § 102

3. The rejection of claims 18-23, and 30 under 35 U.S.C. 102(e) is withdrawn in response to Applicant's cancellation of these claims.

Claim Rejections - 35 USC § 112

4. The rejection of claims 1, 7, 11, 14-15, 18-23, and 24-32 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement is withdrawn in response to Applicant's amendment filed 10/25/2007.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1, 7, 11, and 14-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claim 1 (and those claims dependent therefrom) is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted step is a concluding step wherein the objective of the method set forth in the preamble is reiterated.

8. For example, a process according to the present invention, comprising a concluding step is set forth in the disclosure of the published application at ¶ [0011]: “[T]herefore, according to one aspect of the present invention, a process for making neutral or anionic complexes containing sequestered DNA for gene transfer is provided, in which a stable colloid is formed wherein the aqueous phase has suspended therein a first DNA complex with a cationic surface potential containing a DNA sequence complexed with a cationic lipid or polymer, after which the **surface potential of the first DNA complex is modified to form a stable colloid containing a second DNA complex with a neutral or net anionic surface potential.**”

9. Claim 7 recites the broad range limitation “branched polyamine” and the narrow limitation “polyamines comprising guanidinium groups,” in the same claim. The instant claim is therefore considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c).

10. Claim 11 recites the limitation "further consists of," this phrase is vague and indefinite since claim 1 (from which claim 11 depends from) recites "wherein the DNA complex consists of...." This phrase clearly suggests that the scope of the claimed DNA complex is closed with respect to the limitations following the phrase "consists of" as recited in claim 1, therefore it is unclear how the scope of the DNA complex in claim 1 could *further consists of* anything beyond the scope defined in instant claim 1.

Conclusion

11. Claims 1, 7, 11, and 14-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
